

## Inspections

We inspect at every step to catch problems early and prevent costly recalls.

### Pre-Production Inspections

Confirm materials and components meet your standards before production.

### During Production Inspections

Fix defects early before they multiply.

### Pre-Shipment Inspections

Make sure the right product is going to the right place.

### Piece-by-Piece Inspections

Custom checks for high-value items.

### Container Loading Checks

Watch the packing process to avoid damage or mix-ups.

## Supplier Audits

Get peace of mind about your partners.

### We audit for:

- ✓ Factory legitimacy
- ✓ Social & environmental standards
- ✓ Long-term risk and reliability
- ✓ Quality control systems

## Compliance

Want to import without issues?

### We help you:

- ✓ Spot risks before they cost you
- ✓ Match testing to regional laws and buyer specs
- ✓ Get the paperwork done right
- ✓ Stay on schedule and avoid fines
- ✓ Keep documentation on file for 10+ years

# Why HQTS?

HQTS is your one-stop solution for footwear with in-house testing, on-the-ground experts and end-to-end supply chain management.

Teams on the ground in Asia, Europe, The Middle East, Africa & the Americas.

30 years of experience in quality control

Clear pricing, fast reports, tailored solutions

In-house footwear testing labs

24/7 customer support.

## Common Problems

- Cracked soles
- Poor stitching
- Color fading
- Slipping issues
- Toxic materials
- Delays

## One-Stop Quality Control

We handle quality at every stage to make sure your shoes are built to last and delivered on time.

### Supplier Verification

We check your suppliers are real and can meet your quality and delivery needs.

### Product Inspections

We catch defects during and after production so you're not stuck with faulty goods.

### Supplier Audits

We audit factories for working conditions, quality systems, and risk factors.

### Third-Party Testing

We test shoes for durability and chemicals to meet safety regulations.

### Compliance

We help you meet the rules in your market so there are no customs delays or fines.

## Testing

Footwear gets heavy use. We make sure it holds up and is safe to wear.

### Performance Testing

- Sole flex & abrasion resistance
- Anti-slip and water resistance
- Color fastness & wear resistance
- Coating adhesion & tear strength
- Hardness, rust-proofing & torsion testing

### Chemical Testing

- Banned azo dyes
- Formaldehyde
- Heavy metals
- Pesticide residues
- Phthalates & more
