

Inspections

Problems can pop-up at any stage. That's why we inspect products throughout production.

Pre-Production Inspections

Make sure materials and designs meet safety standards before production starts.

During Production Inspections

Spot defects early to prevent expensive recalls.

Pre-Shipment Inspections

Confirm products meet safety and quality requirements before they leave the factory.

Piece-by-Piece Inspections

For critical products, we check every item for safety and compliance.

Container Loading/Unloading Inspections

Make sure shipping is safe and prevent damage.

Supplier Audits

Not all suppliers follow safety guidelines. We check:

- ✓ Basic Supplier Checks
- ✓ Production Quality
- ✓ Future-Proofing
- ✓ Factory Conditions
- ✓ Risk Assessment

Compliance

Avoid fines, delays, and customs rejections. We provide:

- ✓ CPSIA-certified testing
- ✓ CPC Certification
- ✓ Tracking and Warning Labels
- ✓ 24/7 Compliance Support
- ✓ Sample Selection for Proper Testing

Toys and Children's Product Services

Why HQTS?

We make sure your toys meet global standards, so you never worry about recalls or compliance issues.

40+ countries across Asia, Africa, Europe, and the Americas.

30 years of experience.

Custom solutions tailored to your needs.

Certified to global industry standards.

CPSC accredited.

Common Problems

- Choking Hazards
- Sharp Edges
- Weak Structures
- Toxic Materials
- Flammability Risks
- Incorrect Labels

One-Stop Quality Control

We can manage your entire supply chain from start to finish.

Supplier Verification

We check your suppliers are real, reliable, and meet safety standards.

Product Inspections

Inspect products at every stage to catch defects before they reach customers.

Supplier Audits

Check your suppliers follow ethical, environmental, and quality regulations.

Third-Party Testing

Test products to global safety standards to prevent issues before shipping.

Compliance

Whatever market you're targeting, we'll help you meet regulations.

Testing

Toys need rigorous testing to make sure they're safe for children to use.

Durability Tests	Can it withstand rough play?
Choking Hazard Tests	Are small parts a risk to children?
Flammability Tests	Does it meet fire safety regulations?
Toxic Material Testing	We check for lead, phthalates, and other harmful substances.

And testing to international standards.
