

## Higg FEM (Worldly ID:187 478)

Show your commitment to sustainability with **HQTS Higg FEM**

More than ever, brands and consumers want their products to be made responsibly.

### What is Higg FEM?

Higg FEM measures your factory's performance in key environmental areas, including:

- ✓ Energy use and greenhouse gas emissions
- ✓ Water consumption
- ✓ Air emissions
- ✓ Waste and recycling
- ✓ Wastewater treatment
- ✓ Chemical handling
- ✓ Environmental management systems

### What we offer:

As an official Cascale Higg FEM verifier, HQTS provides:

30+ years of experience

On-site or remote verification

Help with your self-assessment

Fast service, clear pricing, no surprises

Easy-to-understand reports with clear next steps

### Why Higg FEM verification with HQTS?

#### Gain brand confidence

It shows partners you're serious about sustainability.

#### Stay ahead of regulations

Avoid compliance issues by meeting current environmental standards.

#### Spot and fix problems

Identify weak points and get clear solutions.

#### Save time

A single verified report can be shared with all your partners.

## SLCP (SLCP ID:VB932589)

Cut down on repeat audits with  
HQTS SLCP verification

With HQTS SLCP verification, you can show your supply chain meets labor standards without repeat audits.

### What Is SLCP verification?

SLCP verification helps you measure the labor and social standards of your supply chain. This information can then be shared with a global network of partners, saving you time and effort.

### Benefits of SLCP verification

- ✓ No more repeat checks by different clients
- ✓ Saves time and resources
- ✓ Cuts duplication
- ✓ Improves transparency
- ✓ Boosts reputation among customers and investors.

### Why work with HQTS?

**Global quality assurance provider**  
30+ years experience

#### Right first time

Our team makes sure your info is accurate from the start.

#### Save time and stress

Our checklist and support keep you on track and avoid delays.

#### On-site and off-site checks

Our approved verifiers manage the full process.
